PROFILE

I am an undergraduate computer science student. I have previously completed T Levels at the highest achievement. I have an ever venturing want for the technological world. My aim is to try and encompass the skills and values to build my professional portfolio in my desired field of practice being IT.

SKILLS

Customer Service Skills -

During my time at Oldham Council and Sixth form, I was able to develop my communication skills by a great amount, which allowed me to look into customer service skill courses and videos, which helped further develop my communication and service skills

Problem Solving -

During my studies it was essential for me to develop problem solving skills to troubleshoot coding programs and websites, this also helped me develop my critical thinking.

Working under Pressure -

during my time at college and Unity IT, I was met with multiple deadlines. Whether it be portfolios, reports or tasks. During these times, due to being given multiple tasks, I developed the ability to work under pressure and divide my workload into chunks for efficiency.

Communication, Confidence and Conflict resolution -

To date, I feel I have had elements of exposure to professional and academia that have both helped me to build on key skills such as communication, my confidence and most important some attributes in conflict resolution. These are just some of the attributes I feel I am very eager to continue to work and develop and can appreciate the importance of this going forward in my career

LANGUAGES

English - fluent
Bangla - Basic understanding
